

CUSTOMBILT PONDTOONS

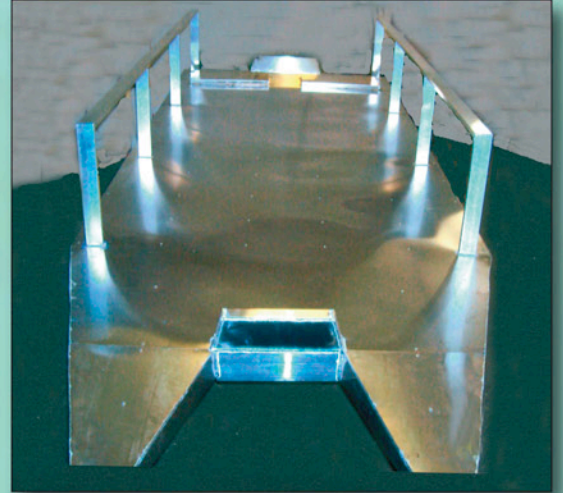

Blue River Outdoors
Inc.

"Your Midwest Source for Custombilt Pondtoons."

Our pontoon boats are all welded aluminum, with a total aluminum deck system. Hulls are 14' on average, constructed of .090 marine grade aluminum with transom and deck systems consisting of the same, durable .090 marine grade aluminum; and come in widths of 5 or 6 foot.

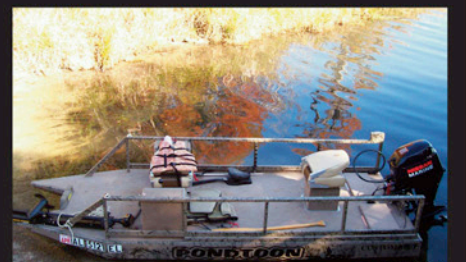

We add 2x1 aluminum hand rails. The standard is 18" off the deck, but can be designed to 24" or our Fly Fishing Edition is only 6" off the deck.

These are very stable and exceed all flotation requirements, and will float in only inches of water. Our warranty is lifetime on welds and 1 year on all other components.

You'll have a product that is built with durability in mind. We offer an uncompromised quality in our construction.

With Aluminum, having no wood, means no worry.

AWESOME EDITIONS

We offer a "Fly Fishing Edition", that features low 6" rails, allowing you all the casting room you need.

Our "Flounder Fishing Edition"

is set up with lights and accessories.

We also have a "Standard Fishing Edition". All can be customized to your needs.

Our "Hunting Series" will let you go undetected with your choice of camo paint.

For all the duck hunters, load up your retriever, sit back and call 'em in. We have a model that is equipped with blinds.

And for that prime piece of hunting property that can only be accessed by water?

Load up the ATV and head out. Your pondtoon can take you places you only dreamed of before.
